

I enjoy hearing K-LOVE on 91.1 FM radio station. It is informative, encouraging, educational, and much more. I listen to it as I commute to work or am in my home. Many teachers I work with listen to it at work as well. I think it would be a huge loss if were to be displaced. It is a source of promoting for ethical and respectful behavior and deepening our understanding of moral behavior. Without resources such as these, I think we would see an even more immediate decline in the basic decent behaviors we would like to see more apparent in our communities and society. I hope you will consider this in deciding about the future program available through FM stations.
